

Internet Safety Tips

"It is important that children stay safe while interacting in the internet community. Communicate with your children so they know the rules and you know they're safe."

- Never post your personal or school information on a blog, in a chat room, Facebook, Myspace, Twitter, etc...
- Never write or respond to someone who has made you feel uncomfortable or scared.
- Tell your parents immediately if you read anything on the Internet that makes you feel uncomfortable.
- Never send a picture of yourself to someone you correspond with on the computer without your parents' permission.
- Never meet someone or allow them to visit you at, or outside of your home without your parents' permission.
- Always remember that some people online may not be who they say they are. Some people will describe themselves as a "12-year-old girl"; however, they could really be an older man.
